

FEEDING IRELAND'S FUTURE

2017

Feeding Ireland's Future (FIF) is an initiative whereby retailers, suppliers and service providers to the Irish food and grocery sector, provide five free pre-employment skills to young unemployment people.

This initiative is promoted by ECR Ireland and is conducted in association with the Department of Social Protection and the Department of Education.

Now in its fourth year, this initiative has been a great success with 24 companies provided skills sessions to c.600 young people over 33 company & 15 Youthreach in 32 locations across Ireland.

Feedback from participating companies is that many young people still require assistance in their quest for employment and participation from companies can be very rewarding for all involved.
